    -!- FUNCTION: Involved in the regulation of growth and apoptosis.
    Mediates activation of stress-responsive MTK1/MEKK4 MAPKKK.
    -!- SIMILARITY: Belongs to the GADD45 family.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              "The transcriptional landscape of the mammalian Science 309:1559-1563(2005).
